

Sierra Renaissance Society

Historic cemeteries invite grave questions of mortality and mystery. In January, we explored genealogical roots and in this presentation, Dr. Bob will acquaint you with personalities and processes of the past that will come alive as he examines historical figures, formalities and maybe even forensics. Dr. Bob's review of historic cemeteries in the Sacramento Area provides a virtual tour featuring highlights of the Sacramento Historic City Cemetery. He will also briefly cover types of burials including new concepts and share a couple of stories about some of the inhabitants of Sacramento Historic Cemeteries and concerns related to historic cemeteries and their preservation. Bob LaPerriere, MD, retired, is the curator of the Sierra Sacramento Valley Medical Society Historical Museum. His last SRS appearance revealed gold rush era medical miseries and practices. This time he takes us to local burial grounds where patients and pioneers did not survive them!
